

Thámova Street Apartment's reconstruction:

Construction:

- glazed lining windows with milled silicone seal, original historical brass fittings
- reconditioned interior doors with original historical brass fittings
- new security entrance door
- new stucco plasters and paintings
- acoustic sound panel wall in the bedroom (10 cm acoustic insulation, 2x SDK Knauf Diamant) with brick facing
- above standard lacquered, 12 cm high plinth around all floors
- dining room and living room: decorative profiles on the walls

Electricity, Lighting and Audiovisual Communication :

- new copper wiring
- new house switchboard
- power increase from the provider (PRE) and three-phase circuit breaker
- above standard assemblies: Legrand Céliane series switches and sockets and ABB retro ceramic switches
- Artemide luminaires and custom-made luminaires
- video intercom

Equipment:

- all rooms have custom made floor to ceiling (3m) sheers and drapes in all rooms with cord operated system (perfect fabric distribution, easy and convenient use/control)
- blackout white window blinds in all south-facing roomf (good for heat regulation on hot summer days)
